

HOW TO ASSESS ELIGIBILITY

REVIEW THE PATIENT'S MEDICAL RECORD TO CONFIRM IF THEY MEET THE ELIGIBILITY CRITERIA

HAS THE PATIENT BEEN:

- ✓ admitted to hospital with **suspected or confirmed*** acute COVID-19 infection
- ✓ are they ≥ 40 years old

If **YES**, do they meet the following criteria:

- ✓ no definite indication or contraindication for Aspirin, Losartan or Simvastatin
- ✓ not already receiving Aspirin, Losartan or Simvastatin
- ✓ not pregnant
- ✓ not currently on mechanical ventilation (via and endotracheal tube)
- ✓ not severely frail (completely dependent and approaching end of life who typically could not recover even from a mild illness)
- ✓ not terminally ill
- ✗ **Patients hospitalised without symptoms of acute COVID-19 infection should not be recruited even if they test positive for COVID-19**

If the patient meets the above criteria, complete the informed consent process

***CRITERIA FOR A SUSPECTED CASE:**

- A. Patient with acute respiratory illness* AND a history of travel to or residence in a location reporting community transmission of COVID-19 disease during the 14 days prior to symptom onset;
OR
- B. A patient with any acute respiratory illness AND having been in contact with a confirmed or probable COVID-19 case in the last 14 days prior to symptom onset;
OR
- C. A patient with severe acute respiratory illness* AND requiring hospitalisation AND in the absence of an alternative diagnosis that fully explains the clinical presentation.

** fever and at least one sign/symptom of respiratory disease, e.g., cough, shortness of breath*
