

CRASH-19

Aspirin, losartan & simvastatin in hospitalised COVID-19 patients: a multinational randomised open-label factorial trial

How to use the trial database:
accessing and navigating the database

The CRASH-19 trial database

- Data for the CRASH-19 trial MUST be sent via **direct data entry online** into the trial database
- The database will collect the following:
 - Electronic consent
 - Entry and Randomisation data
 - Outcome data
 - Serious Adverse Reaction data
- For any issues using the database, contact the CTU on crash19data@lshtm.ac.uk for advice.

Obtaining access to the database

A written request for the individual to have database access from the Principal Investigator

Emailed to crash19data@Lshtm.ac.uk

Individuals will receive an email with a link to set up unique password

Log in using **username** and password

Username:
Password:
Re-type password:

Submit

Note: Your 'username' is the same email address used to set up password

Log in details

- Each staff member with delegated responsibility to enter data must have their own unique database log in account
- Log in details must **NOT** be shared with anyone
- Your password should be memorable but secure i.e. use a combination of characters, numbers and capital/non-capitals
- Forgot your log in details?
Contact crash19data@lshtm.ac.uk to request a reset

Using the online database

- Access to database allows:
 - add participant data
 - view of all data entered for your hospital
 - view of all open and closed data queries
 - resolution of all open queries

The database will close down after 20 minutes of inactivity – you will lose any unsaved forms and will need to log in again

Record Status Dashboard (all records)

Displayed below is a table listing all patients randomised at your associated site, and CRFs. To add a new participant, click the '+ Add new record' button. To view any existing patient CRFs, click the coloured **circle button** under the column for that CRF. To view the patient's record page, and all CRFs for that patient, click on the patient randomisation number. Different lists of patients can be viewed using the drop-down menu next to 'Dashboard displayed'.
Note: Ensure the [Default dashboard] is selected to display the full list of patients and CRFs.
